and a reduction in the number of Grand Prix classes. In other respects it has enjoyed remarkable continuity, as motor cycle racing has remained the domain of the major manufacturers anxious to promote the awareness of their road machines. Contemporary Grand Prix designs are clearly descended from the bikes raced in the 1950s. This book traces the major trends and developments during the last 50 years and it profiles the legendary riders, teams and innovators that have dominated the sport during this period. Concluding the history is a comprehensive and detailed results section which provides an invaluable source of reference for any motor cycle enthusiast.

The role of biochar in improving soil fertility is increasingly being recognized and is leading to recommendations of biochar

amendment of degraded soils. In addition, biochars offer a sustainable tool for managing organic wastes and to produce added-value products. The benefits of biochar use in agriculture and forestry can span enhanced plant productivity, an increase in soil C stocks, and a reduction of nutrient losses from soil and non-CO₂ greenhouse gas emissions.

Nevertheless, biochar composition and properties and, therefore, its performance as a soil amendment are highly dependent on the feedstock and pyrolysis conditions. In addition, due to its characteristics, such as high porosity, water retention, and adsorption capacity, there are other applications for biochar that still need to be properly tested. Thus, the 16 original articles contained in this book, which were selected and evaluated for

this Special Issue, provide a comprehensive overview of the biological, chemico-physical, biochemical, and environmental aspects of the application of biochar as soil amendment. Specifically, they address the applicability of biochar for nursery growth, its effects on the productivity of various food crops under contrasting conditions, biochar capacity for pesticide retention, assessment of greenhouse gas emissions, and soil carbon dynamics. I would like to thank the contributors, reviewers, and the support of the Agronomy editorial staff, whose professionalism and dedication have made this issue possible.

Some of music's biggest stars:

“Gripping.”—Philadelphia Magazine As a struggling musician trying to catch a break in 1980s Philadelphia, Chris Schwartz navigated the crime-infested, morally bankrupt music industry to found and build one of the most successful hip-hop record labels in the world. That label was Ruffhouse, which launched the careers of Nas, The Fugees, Cypress Hill, and others, dominating the charts and generating global revenues of over a billion dollars. Schwartz and his partner, Joe Nicolo, built Ruffhouse from one desk and a phone to one of hip-hop's most revered record companies while simultaneously struggling with drug addiction and alcoholism. A story of money, greed, envy, betrayal, violence, addiction, loss, and redemption, not to mention a whole lot

of music, Ruffhouse reveals the inside story of the record companies, recording studios, tour buses, private jets, mansions, radio stations, and concert halls at the height of hip-hop's 1990s heyday while also uncovering the darker side of the business, from police stations to rehab clinics, courtrooms to prisons. Told in Schwartz's own candid, searing prose, Ruffhouse is a portrayal of hip-hop culture at its tipping point, as it transitioned from urban curiosity to global phenomenon. "[A] story of adversity and perseverance... Fans of these artists will love the insider information on the recording process and the trials and tribulations of getting this music out into the world." Library Journal "All respect to Chris Schwartz. He is a great visionary."—Nas
