A National Book Award Finalist "The best novel yet about 9/11.... A brilliant new comedy of manners, A Disorder Peculiar to the Country is about the way a conflict takes on a logic and momentum of its own." –Salon "Savagely hilarious." –Elle Joyce and Marshall each think the other is killed on September 11—and must swallow their disappointment when the other arrives home. As their bitter divorce is further complicated by anthrax scares, suicide bombs, and foreign wars, they suffer, in ways unexpectedly personal and increasingly ludicrous, the many strange ravages of our time. In this astonishing black comedy, Kalfus suggests how our nation's public calamities have encroached upon our most private illusions.

In this withering satire of American life, Marshall and Joyce are conducting a scorched-earth divorce campaign against each other. On the grim day when New York City is overcome with grief and shock, each thinks the other is dead, and each is visited by an intense, secret, guilty satisfaction. Both survive only to continue their fighting.

Obsessed by a belief that highly evolved beings exist on Mars, a turn-of-the-century British astronomer gets support for a massive project to build a signal that is undermined by malaria-stricken Egyptian laborers and two women who understand the astronomer more than he realizes. A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately

brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

On September 11th, a couple in the midst of a divorce, each believing the other has been killed in the attack, discover that they both have survived and continue on with their fierce battle over assets.

Russia, 1910. Leo Tolstoy lies dying in Astapovo, a remote railway station. Members of the press from around the world have descended upon this sleepy hamlet to record his passing for a public suddenly ravenous for celebrity news. They have been joined by a film company whose cinematographer, Nikolai Gribshin, is capturing the extraordinary scene and learning how to wield his camera as a political tool. At this historic moment he comes across two men -- the scientist, Professor Vorobev, and the revolutionist, Joseph Stalin -- who have radical, mysterious plans for the future. Soon they will accompany him on a long, cold march through an era of brutality and absurdity. The Commissariat of Enlightenment is a mesmerizing novel of ideas that brilliantly links the tragedy and comedy of the Russian Revolution with the global empire of images that occupies our imaginations today.

This book challenges traditional notions of literary criticism, arguing that all attempts by writers, critics and literary theorists to define the language of literature have involved self-contradiction. Through examination of key moments in literary history, Derek Attridge demonstrates that such contradictions in accounts of literary language are embedded in our cultural concept of 'literature', and asserts that in order to appreciate the forces that determine the limits of literary language we must look beyond the realm of the 'literary' and embrace the wider political and social sphere. While key examples have been drawn from the Renaissance, Romanticism and the work of James Joyce, Attridge's unique application of deconstructive methods has ensured that the influence of this book has been felt across the entire field of literary studies.

In the spirit of Vanessa Diffenbaugh's *The Language of Flowers*--and with a touch of the magical--*The Peculiar Miracles of Antoinette Martin* is a spellbinding debut about a wondrously gifted child and the family that she helps to heal. Sisters Rose and Lily Martin were inseparable when growing up on their family's Kentucky flower farm yet became distant as adults when Lily found herself unable to deal

with the demands of Rose's unusual daughter. But when Rose becomes ill, Lily is forced to return to the farm and to confront the fears that had driven her away. Rose's daughter, ten-year-old Antoinette, has a form of autism that requires constant care and attention. She has never spoken a word, but she has a powerful gift that others would give anything to harness--she can heal with her touch. She brings wilted flowers back to life, makes a neighbor's tremors disappear, and even changes the course of nature on the flower farm. Antoinette's gift, though, comes at a price, since each healing puts her own life in jeopardy. As Rose--the center of her daughter's life--struggles with her own failing health and Lily confronts her anguished past, the sisters, and the men who love them, come to realize the sacrifices that must be made to keep this very special child safe. Written with great heart and a deep understanding of what it feels like to be different, *The Peculiar Miracles of Antoinette Martin* is a novel about what it means to be family and about the lengths to which people will go to protect the ones they love. "This is the kind of book that invites you home, sits you down at the kitchen table, and feeds you something delicious and homemade. You will want to stay in this world where new relationships bloom out of broken ones, sisters find one another again, and miracles really do occur." --Tiffany Baker

The explosive new collection by the celebrated author of *Thirst* and PEN/Faulkner Award finalist *Pu-239* and *Other Russian Fantasies*, *Coup de Foudre* is the kind of groundbreaking work of literary invention Ken Kalfus's fans have come to expect. The book is anchored by the full text of the provocatively topical title novella that appeared in *Harper's*, a sometimes farcical, ultimately tragic story about the president of an international lending institution accused of sexually assaulting a housekeeper in a New York hotel. Recalling recent news events with irony and compassion, Kalfus skewers international political gridlock and the hypocrisies of acceptable sexual conduct. In "The Moment They Were Waiting For," a murderer on death row casts a spell granting the inhabitants of his city the foreknowledge of the dates they will die. In "v. The Large Hadron Collider," a judge distracted by the faint possibility of an adulterous affair must decide whether to throw out a nuisance lawsuit that raises the even fainter possibility that the entire Earth may be destroyed. "The Un-" is a nostalgic story of a young writer's struggles as he tries to surmount the colossal, heavily guarded wall that apparently separates writers who have been published from those who have not. Varying boldly in theme, setting, and tone, the stories in *Coup de Foudre* share Kalfus's distinctive humor and intellect, inextricably bound with high literary ambition.
