Time-weighted-
average (TWA)
monitoring is

Online Library Air Monitoring

For Toxic Exposures

used to assess the average exposure of a worker to one or more chemicals over a specified period of time - usually a standard eight-hour shift. This is conveniently carried out using diffusive or pumped

Online Library Air Monitoring

Sampling, but
does mean that,
for limited
periods, a
worker may be
exposed to
concentrations
higher than the
threshold limit
value (TLV).

*Industrial air
monitoring -
Worker exposure*

Online Library Air Monitoring

We offer comprehensive COSHH air monitoring to determine the levels of substances in the workplace and ensure the workplace exposure limits value is not exceeded for the substances you

Online Library Air Monitoring

For Toxic Exposures
use. We will also provide a detailed report on work practices and findings together with recommendations for remedial action.
