How to raise the achievement of all kids, from gifted to those with severe disabilities This book presents lessons learned from in-depth case studies of some of our most effective inclusive public schools. The authors conclusively demonstrate that schools can educate students with mild and severe disabilities in general education classrooms by providing special education services that link to and bolster general education instruction. This goes beyond complying with Special Education law; having a truly inclusive environment raises the achievement level for all students and results in more committed and satisfied teachers. Insights shared from teachers, school leaders, parents, and the students themselves provide a path forward for anyone striving to improve special education services. The authors reveal what these exemplary schools do that makes them so successful, and provide advice for readers who want to incorporate these practices themselves. Hehir, former U.S. Office of Special Education (OSEP) Director, is a leading name in Special Education Highlights the important relationships between administrators, teachers, and parents to foster maximum collaboration between general and special education Includes information on committing to Universal Design for Learning (UDL) and Positive Behavior Supports This vital resource zeroes in on what excellent public schools do differently to ensure all students succeed.

This book features case studies from teachers, leaders and educational professors on inclusion in schools. Using a conception of inclusion that acknowledges issues of race, gender, class, sexual orientation, religion and ability, this book provides readers with a useful blend of theory and practice.

Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. Each case, written in an engaging, narrative style, presents a complex but common classroom scenario in which an inequity or injustice is in play. These cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and all content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersection of these issues are stressed throughout the cases, reflecting the multi-faceted way they play out in real life. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called points for consideration. This unique feature provides valuable insight for understanding the complexities of each case.

This book prepares current and future educational leaders to adapt to the changing terrain of U.S. demographics, education, and immigration policy. *Educational Leadership of Immigrants* highlights the educational practices and discourses around immigration that intersect with policies and laws, in order to support K-12 students' educational access and families' participation in schooling. Drawing primarily on research from the fields of educational leadership and educational policy, this book employs a case study approach to address immigration in public schools and communities; school leaders' responses to ethical dilemmas; the impact of immigration policy on undocumented students; and the varying cultural, sociopolitical, legal and economic contexts affecting students' educational circumstances. Special features include:

- case narratives drawn from real-life experiences to support the educational needs of immigrant students;
- teaching activities and reflective discussion questions pertaining to each case study to crystallize leaders' knowledge and facilitate their comfort levels in practice;
- discussions of current challenges in education facing immigrant students, their families, educators, and school leaders, especially with changing immigration law.

Over the last decade, the educational context for students with disabilities has significantly changed primarily as a result of mandates contained in NCLB and IDEA. The purpose of this book is to summarize the research literature regarding how students might be provided classrooms and schools that are both inclusive and effective. Inclusive schools are defined as places where students with disabilities are valued and active participants in academic and social activities and are given supports that help them succeed. Effectiveness is addressed within the current movement toward multi-tiered systems of support and evidence-based practices that meet the demands of high-stakes accountability.

This book provides case studies and resources to help school principals develop skills and knowledge in leading inclusive schools for students with special education needs.
