Case studies - Early Childhood Education and Care

Research is something many Early Childhood Studies students find intimidating. As a result this book has been designed with early childhood student in mind to help them through the research process. The book covers the whole research journey exploring the different methodologies & principles as well as how to undertake a research project, making it a whole course companion.

Provides examples of actual encounters students or practitioners might have if they were to observe classes in many different developmentally appropriate settings and listen in on some of the teachers' thought processes.

Being the director of an early childhood education program not only includes knowing about child development and developmentally appropriate curriculum, but it also requires a director to supervise staff, manage the facility, create budgets, and implement policies to manage a business. Sticky Situations is a collection of case studies to help early childhood educators walk through management

scenarios and brainstorm the best way to solve typical childcare program problems. Each case study addresses a situation that a director may encounter in an early childhood program. The case study also includes reminders about best practices for the field of early childhood education, one possible method for addressing the situation, and discussion questions to evaluate the way that the situation was resolved. This is a fabulous tool for current program directors or those in training programs for early childhood management.

This unique book explores research related to education for sustainability within early childhood education in the United Kingdom. Divided into the four home nations, it examines what education for sustainability looks like in practice, discusses the different application and positions of each region, and considers the contribution of early childhood education to support the Sustainable Development Goals. Each chapter considers the relevant early years framework and includes associated case studies which highlight connections between statutory guidance, policy and positive early years pedagogical practice. The authors use an education for sustainability lens to explore the critical issues and explicit and implicit links embedded in each of the curricula frameworks. Each chapter acknowledges the context of outdoor learning with discussion related to different interpretations of ecological sustainability. This exploration should help readers to consider the idea of sustainability within early childhood education. The book considers early childhood education as a distinct and valuable phase beyond the readiness for school discourse and recognises the importance of having skilful and knowledgeable adults to work with young children from birth. It offers a unique resource for students, practitioners, leaders and researchers engaged in the study of education for sustainability in early childhood and the importance of the early years for the development of life-long pro-environmental attitudes.

In this book, the authors discuss criteria and methodologies for evaluating and improving the quality of learning, and show how to evaluate practice and create action plans for improvement. They present a variety of case studies, including: a family centre; LEA nursery unit; a workplace nursery, an LEA nursery class; an inner-city reception class in a primary school; private day nurseries; and a social services day nursery. Each example is accompanied by a set of questions which highlight important features of the research process and suggest ways in which early years practitioners can examine and reflect on their own practice. This book draws on the experience of practitioners involved in the "Effective Early Learning Research Project," developed to support early learning wherever young children are, whether in education, care, social services, health, voluntary sector, private sector, or state sector, from birth to 7 years. This book is essential reading for all early years practitioners,

students, inspectors and trainers.

Sociocultural Issues in Physical Education: Case Studies for Teachers is useful to a wide range of individuals interested in increasing their sociocultural awareness and knowledge in order to consider how students' experiences are shaped in and through physical education classes. This book may be especially useful to teacher candidates and as a professional development tool. What happens in physical activity learning spaces is of great significance to the learners that occupy those spaces. Broadly speaking, one cannot deny that education is rife with error, nor can one ignore the presence of global-level issues in physical education. Using a case study approach, this book addresses social and cultural issues that can and do arise in physical education. This book offers a tool for studying and better understanding how social and cultural issues impact student learning in physical education. Chapter authors point toward possibilities for better understanding sociocultural issues in physical education settings.

This much-needed case study book provides higher education and student affairs graduate students, practitioners, and faculty with the tools to enhance their learning of student development theory and to apply this learning to practice. Each chapter offers a summary of theory - covering traditional and newer student development models - in addition to multiple case studies that help readers focus on practice that fosters social justice and inclusion. The case studies for each chapter represent a range of institutional types and diverse student populations, offering an opportunity to explore the intersections of various developmental processes and to foster social justice and inclusion in higher education contexts. Guiding questions at the end of each case study offer opportunities for further discussion and critical reflection. An essential text for every student development course, Case Studies for Student Development Theory enhances student learning and development in higher education while also addressing how students' social identities intersect with college campus environments.

Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. The accessibly written cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. This revised edition adds ten new cases to offer greater coverage of elementary education, as well as topics such as body-shaming, Black Lives Matter, and transgender oppression. Existing cases have been updated to reflect new societal contexts, and streamlined for ease-of-use. The book begins with a seven-point

Download File PDF Case Studies In Early Childhood Education Implementing Developmentally Appropriate Practices

process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersections of these issues are stressed throughout the cases, reflecting the complexities of real-life scenarios. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called 'Points for Consideration.' This unique feature provides valuable insight for understanding the complexities of each case.

The amount of information currently available on pediatric epilepsy, as with all burgeoning fields, can seem overwhelming. *Pediatric Epilepsy Case Studies: From Infancy and Childhood through Adolescence* reviews the recent flood of new information on the pathophysiology, genetics, and treatment of the various epilepsy syndromes and distills it into an easy-to-use guide. Edited by respected and well-known leaders in the field, the book provides brief, but thorough, descriptions of the different syndromes commonly encountered in clinical practice across the pediatric range. Grasping the complexity and nuances associated with various epileptic syndromes can be daunting. Therefore, the book begins with an introduction to the fundamentals of epilepsy. Subsequent sections include succinct case presentations and clinically relevant discussions of the more common epilepsy syndromes affecting each age group. The chapter authors describe why they chose each particular case, what they learned, and how it changed their practice. The extensive resource section provides an authoritative guide to relevant findings scattered in the literature. Research in the field of epilepsy will continue at a rapid pace, with the ultimate hope of curing many intractable epilepsy syndromes. Organized chronologically, from neonate through adolescence, this book is the culmination of a group effort involving leading physicians and researchers whose contributions constitute a concise and practical reference for health professionals in training.

This book provides an accessible introduction to using case studies. It makes sense of literature in this area, and shows how to generate collaborations and communicate findings. The authors bring together the practical and the theoretical, enabling readers to build expertise on the principles and practice of case study research, as well as engaging with possible theoretical frameworks. They also highlight the place of case study as a key component of educational research. With the help of this book, M-Level

students, teacher educators and practitioner researchers will gain the confidence and skills needed to design and conduct a high quality case study. Dr Lorna Hamilton is a Senior Lecturer in Education Research at the University of Edinburgh. Dr Connie Corbett-Whittier is an Associate Professor of English and Humanities at Friends University, Topeka, Kansas. 'Drawing on a wide range of their own and others' experiences, the authors offer a comprehensive and convincing account of the value of case study in educational research. What comes across - quite passionately - is the way in which a case study approach can bring to life some of the complexities, challenges and contradictions inherent in educational settings. The book is written in a clear and lively manner and should be an invaluable resource for those teachers and students who are incorporating a case study dimension into their research work.' -Ian Menter, Professor of Teacher Education, University of Oxford 'This book is comprehensive in its coverage, yet detailed in its exposition of case study research. It is a highly interactive text with a critical edge and is a useful tool for teaching. It is of particular relevance to practitioner researchers, providing accessible guidance for reflective practice. It covers key matters such as: purposes, ethics, data analysis, technology, dissemination and communities for research. And it is a good read!' - Professor Anne Campbell, formerly of Leeds Metropolitan University 'This excellent book is a principled and theoretically informed guide to case study research design and methods for the collection, analysis and presentatin of evidence' - Professor Andrew Pollard, Institute of Education, University of London Research Methods in Education series: Each book in this series maps the territory of a key research approach or topic in order to help readers progress from beginner to advanced researcher. Each book aims to provide a definitive, market-leading overview and to present a blend of theory and practice with a critical edge. All titles in the series are written for Master's-level students anywhere and are intended to be useful to the many diverse constituencies interested in research on education and related areas. Other books in the series: - Qualitative Research in Education, Atkins and Wallace - Action Research in Education, McAteer - Ethnography in Education, Mills and Morton For more about the series and additional resources visit the BERA/SAGE series page here.
