centuries. The book can then be seen as a brief history of the human quest for answers to the mysteries of the universe. There is no way that a book on physics can be written to read like a novel. The motivated reader, however, may come to see the story of physics as an intriguing

detective novel, in which a side detail of one day becomes a

Extensively researched fictionalized account of Grandison Harris' procurement of cadavers for the Medical College of Georgia.

Tad McGreevy has a power that he has never revealed, not even to his life-long best friend, Stevie Scranton. When Tad looks at others, he sees colors. These auras tell Tad whether a person is good or evil. At night, Tad dreams about the evil-doers, reliving their crimes in horrifyingly vivid detail. But Tad doesn't know if the evil acts he witnesses in his nightmares are happening now, are already over, or are going to occur in the future. He has no control over the horrifying visions. He has been told (by his parents) never to speak of his power. All Tad knows is that he wants to protect those he loves. And he wants the bad dreams to stop.

The United States, once upon a time not long ago, was filled with family farms. You could walk along a country road and pass family after family. They'd maybe be working in the fields or around in the yard. They might be lounging on the porch drinking sweet cold tea. No big operations on houseless land, no amalgamations, no paved roads, no total efficiency, just home. They'd wave, and you'd wave. Growing fills a child's day all the way up. Years later we might -- or might not -- remember what was happening in the big world. Like the Great Depression, which (for some) was gone. And World War II, fought by Americans (mostly farm boys) far from home. In the 1940s, a child was growing up hungry to learn. She already knew that mules, herd dogs, and turkey gobblers don't like children but nanny goats and little dogs do, that bare feet are best, and that money is 'way less important than freedom and good grownups. Soon as she could read and print, she filled a dime-store diary every year. Each had a tiny clasp and key. At the end of summer 1949 she unlocked her diaries and found them tricky to read but full of true-to-life telling about animals, clashes, bravery, tangles, crops, shadows, lightning bugs and lightning. She spent 4 months translating their jumble into 20-some notebooks. Being in school by now and seeing differences, she added fierce defenses of feed-sack playclothes, outdoor toilets, and country ways. Being so young, the child couldn't grasp these further challenges of the 1940s: Farms are where the Great Depression hit first and gripped longest. Family farms depend on people who belong on the land, who brave its uncertainties. Those people are not considered good credit risks. Others without a clue how valuable farm life can be might get title. This means the ones with the most to lose often lose. Far more Americans went to war from farms than cities. Many came home eager to take up the lives they laid down. But post-war farmland could be bought up cheap by outsiders. On this confusing new battleground, who is the enemy? The Depression and the Duration combined to teach a dangerous double lesson: Take life day by day. Don't look too far forward. MINERAL SPRINGS ROAD 1940s is a little girl's notebooks, put together and expanded from memory. Its characters are tame, half-tame, and wild. At age not-quite-10, she's only half-tame herself, and too busy growing to realize how much she knows. Some chapters in her book: Reddish-Goldilocks Walking-Distance People How We Got Toby Pee Dee Country Nanny and the Soft Top Cap's Luck How Not To Ride a Mule Day of the Mad Fox The Army Air Base, the WAC, and Lassie Darlington Auction Market The Mint-Green House Storm, Lightning, Fire

Just as Masters and Johnson were pioneers in the study of human sexuality, so Dr. John Gottman has revolutionized the study of marriage. As a professor of psychology at the University of Washington and the founder and director of the Seattle Marital and Family Institute, he has studied the habits of married couples in unprecedented detail over the course of many years. His findings, and his heavily attended workshops, have already turned around thousands of faltering marriages. This book is the culmination of his life's work: the seven principles that guide couples on the path toward a harmonious and long-lasting relationship. Straightforward in their approach, yet profound in their effect, these principles teach partners new and startling strategies for making their marriage work. Gottman helps couples focus on each other, on paying attention to the small day-to-day moments that, strung together, make up the heart and soul of any relationship. Being thoughtful about ordinary matters provides spouses with a solid foundation for resolving conflict when it does occur and finding strategies for living with those issues that cannot be resolved. Packed with questionnaires and exercises whose effectiveness has been proven in Dr. Gottman's workshops, *The Seven Principles for Making Marriage Work* is the definitive guide for anyone who wants their relationship to attain its highest potential. *The Seven Principles for Making Marriage Work* is the result of Dr. John Gottman's many years of closely observing thousands of marriages. This kind of longitudinal research has never been done before. Based on his findings, he has culled seven principles essential to the success of any marriage. Maintain a love map. Foster fondness and admiration. Turn toward instead of away. Accept influence. Solve solvable conflicts. Cope with conflicts you can't resolve. Create shared meaning. Dr. Gottman's unique questionnaires and exercises will guide couples on the road to revitalizing their marriage, or making a strong one even better.

When a brooch is broken, some of its magic is lost... When NYPD detective JL O'Grady is invited to be her brother's plus-one at Montgomery Winery's end-of-harvest gala, she plans to enjoy a fabulous weekend in Napa drinking wine, enjoying sunset dinners on the veranda, and watching her brother's high school basketball tournament. Instead, she's pulled into a murder investigation hauntingly similar to a New York City racketeering and drug case that nearly ended her career. The local cops insist she steer clear of their investigation, but JL's gut instincts - and fears for her brother's safety - drive her deeper into the case. With help from MacKlenna Corporation's irresistibly handsome and charming CFO, Kevin Allen, she searches for a connection between the two cases, while at the same time her connection with Kevin rockets from mild to scorching in a New York minute. When another crime hits too close to her heart, the stakes escalate and endanger not only JL, but the entire MacKlenna Clan as well. Now it's up to JL and Kevin - with a little help from David McBain, who is drowning in toddler hell - to solve the case. With time running out and danger closing in, JL and Kevin rush to discover the killer's identity before someone else is murdered, and while they're at it, they might just find what's been missing from both their lives for far too long.

When the Civil War threatened to destroy the United States, three brothers from rural Miami County Indiana, Joseph, Abner and Charles Wait, volunteered to fight for their country and help put down the Southern rebellion. This is their story spanning four years of war and the death of the youngest brother, 19-year-old Charles, at a hellish POW camp in Salisbury, North Carolina. The diaries of Joseph Wait, the oldest brother, and Benjamin Booth, a Salisbury survivor, vividly depict the sacrifices made by the Wait brothers--and thousands like them--that saved the Union and gave America a new birth of freedom.
