as the sole-source powerplant for its Next-Generation 737 range, the CFM56-7B develops 19,500 to 27,300 pounds of thrust.

---

### CFM56-7B | Safran Aircraft Engines

Upgrading these aircraft with the commercial CFM56-7B engine would enable these platforms to fly well into the future as ABMS evolves. Compared to the current engines, the CFM56-7B engine is capable of providing higher thrust capability with the possibility of a de-rate and 25-30 percent better fuel burn, depending on the application.
