The office of notary public has a long and proud history in our society. Their work is rarely glamorous, but it is so important that the highest courts in the nation routinely accept properly notarized documents as evidence in legal matters. In fact, the law governing notaries gives them the same mission as sworn law enforcement officers, "to serve and protect."

In *Law's Dominion*, Jay Berkovitz offers a new history of early modern Jewry. Set in the

This second edition of the Reference Guide is a comprehensive source of practical information on how countries can fight money laundering and terrorist financing. Aimed at helping countries understand the new international standards, it discusses the problems caused by these crimes, the specific actions countries need to take to address them, and the role international

Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the

world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be

overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign

jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the

proceeds of corruption and to facilitate more systematic and timely return of stolen assets.

"Both marriages and divorces, understood as the dissolution of a legally contracted marriage, are widespread throughout modern-day European societies. The fate of both institutions was, however, diametrically different in the centuries following the collapse of the Roman Empire in the West. While marriage has always enjoyed popularity,

divorce in the past was a rare occurrence and, in some regions and times, it was non-existent altogether. In the second millennium of our era, in the territories dominated by the Roman Church, divorce had been marginalized" --
