The WeSolveThem Team consists of a group of US educated math, physics and engineering students with years of tutoring experience and high achievements in college. WESOLVETHEM LLC is not affiliated with the publishers of the Stewart Calculus Textbooks. All work is original solutions written and solved by "The WeSolveThem Team." We do not provide the questions from the Stewart textbook(s), we just provide our interpretation of the solutions.

Donations, Inheritance and Property in the Nordic and Western World from Late Antiquity until Today presents an examination of Nordic donation and gift-giving practices in the Nordic and Western world, beginning in late Antiquity and extending through to the present day. Through chapters contributed by leading international researchers, this book explores the changing legal, social and religious frameworks that shape how donations and gifts are given. In addition to donations to ecclesiastical, charitable and cultural institutions, this books also highlights the sociological challenges and the tensions that can occur as a result of transferring property, including answering key questions such as who has a right to what. It also presents, for the first time, an insight into the dynamics of donations and the interplay between individual motivations, strategic behaviour and the legal setting of inheritance law. Offering a broad chronological and European perspective and including a wide range of illuminating case studies Donations, Inheritance and Property in the Nordic and Western World from Late Antiquity until Today is ideal for students of Nordic and European legal and social history.

1984 is George Orwell's terrifying vision of a totalitarian future in which everything and everyone is slave to a tyrannical regime lead by The Party. Winston Smith works for the Ministry of Truth in London, chief city of Airstrip One. Big Brother stares out from every poster, the Thought Police uncover every act of betrayal. When Winston finds love with Julia, he discovers that life does not have to be dull and deadening, and awakens to new possibilities. Despite the police helicopters that hover and circle overhead, Winston and Julia begin to question the Party; they are drawn towards conspiracy. Yet Big Brother will not tolerate dissent - even in the mind. For those with original thoughts they invented Room 101. . .

This updated second edition of the Catechism of the Catholic Church incorporates all the final modifications made in the complete, official Latin text, accompanied by line-by-line explanations of orthodox Catholicism, summaries of each section, a detailed index, extensive cross-references, and helpful footnotes.

"European Community-African-Caribbean-Pacific" (varies).

Since the end of the last century, UN peacekeeping has undergone a fundamental and largely unexamined change. Peacekeeping operations, long expected to use force only in self-defence and to act impartially, are now increasingly relied upon by the Security Council as a means to maintain and restore security within a country. The operations are established under Chapter VII of the UN Charter and some are empowered to use 'all necessary measures', language traditionally reserved for enforcement operations. Through a close examination of these twenty-first century peacekeeping operations - including operations in Sierra Leone, the Democratic Republic of the Congo, Liberia, Côte d'Ivoire, Haiti and the Darfur region of the Sudan - the book shows that they are, for the most part, fundamentally ill-suited to the enforcement-type tasks being asked of them. The operations, which are under-funded, under-equipped and whose troops are under-trained, frequently lurch from crisis to crisis. There is scant evidence, some 10 years on, that matters are likely to improve. The book argues that bestowing enforcement-type functions on a peacekeeping operation is misconceived. Such operations are likely to be unsuccessful in their enforcement-type tasks, thereby causing serious damage to the excellent reputation of UN peacekeeping, and the UN more broadly. In addition, because such operations are more likely to be perceived as partial, their ability to carry out traditional (non-forceful) peacekeeping tasks may be impeded. Finally, the Security Council's practice of charging peacekeeping operations with enforcement functions lessens the pressure on the Council to work to establish genuine enforcement operations - ie, operations that are considerably better suited to restoring peace and security. ...Dr Sloan is able to show, in knowledgeable detail, not only what has changed over the years, but also what has brought these changes about. His analysis leads him to offer not only well-informed insights, but critical observations, too...This book is a pleasing combination of detailed scrutiny of topics already familiar (provisional measures, consent, so-called Chapter VII'2' action, implied powers) and a rigorous questioning as to their place in – or indeed, relevance at all to – militarised peacekeeping. The reader will find much new terrain traversed, and plenty of out-of-the-box thinking.' From the foreword by Dame Rosalyn Higgins

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.
