contemporary approach to diagnosis and manage-ment of angina taking into consideration epicardial coronary disease, microcirculatory dysfunction and coronary vasospasm. ConTEmporary ang Ina CLass fICaTIon by paTHopHysIoLoGy The clinical history is of paramount importance to initially establish whether the nature of the

~~Angina: contemporary diagnosis and management~~

The current article thus proposes a reasoned approach to management based on evaluation of pathophysiological mechanisms. We contest that angina and INOCA are syndromes and not a precise diagnosis (akin to myocardial infarction with no obstructive CAD-MINOCA).

The bottom line A pleural effusion describes an excess of fluid in the pleural cavity, usually resulting from an imbalance in the normal rate of pleural fluid production or absorption, or both. Pleural effusions are common, with an estimated 1-1.5 million new cases in the United States and 200 000-250 000 in the United Kingdom each year.¹ This review describes how pleural effusions may be ...
