Democratization is the most comprehensive volume on this critical field of contemporary politics, with insightful coverage of the key theories, actors, dynamics, and developments. This authoritative guide brings together leading experts from diverse international backgrounds, including some of the best known names in the field, making it an invaluable resource to students of democratization. This second edition reflects the dramatic changes in today's political world, with empirical coverage of developments on every continent. It considers the role of new technologies, including a dedicated chapter on social media and democratization, as well as the resilience of authoritarian tendencies in many parts of the world. The book is accompanied by a range of online resources designed to support both students and lecturers. For students: - Revise key terms and test your knowledge of terminology from the book with our digital flashcard glossary. - Expand your knowledge of key developments in world affairs with additional case studies. - Take your learning further with links to reliable web content and relevant OUP journals. For registered adopters of the textbook: - Guide class debate with suggested seminar questions and activities. - Adapt PowerPoint(R) slides as a basis for lecture presentations, or use as handouts in class.

Presents "Democratization" (ISSN 1351-0347), a quarterly journal that is published by Frank Cass Publishers in Essex, England, and Portland, Oregon. Notes that the journal contains articles that focus on democratization as a process. Lists the contents of the current and future issues. Includes ordering information.

The collapse of Communism has created the opportunity for democracy to spread from Prague to the Baltic and Black Seas. But the alternatives—dictatorship or totalitarian rule—are more in keeping with the traditions of Central Europe. And for many post-Communist societies, democracy has come to be associated with inflation, unemployment, crime, and corruption. Is it still true, then, as Winston Churchill suggested a half-century ago, that people will accept democracy with all its faults—because it is better than anything else? To find out, political scientists Richard Rose, William Mishler, and Christian Haerpfer examine evidence from post-Communist societies in eastern Europe. Drawing on data from public opinion and exit polls, election results, and interviews, the authors present testable hypotheses regarding regime change, consolidation, and prospects for stabilization. The authors point out that the abrupt transition to democracy in post-Communist countries is normal; gradual evolution in the Anglo-

American way is the exception to the rule. While most recent books on democratization focus on Latin America and, to some extent, Asia, the present volume offers a unique look at the process currently under way in nine eastern European countries: the Czech Republic, Hungary, Slovakia, Poland, Slovenia, Bulgaria, Romania, Belarus, and Ukraine. Despite the many problems these post-Communist societies are experiencing in making the transition to a more open and democratic polity, the authors conclude that a little democracy is better than no democracy at all.

This book presents a comprehensive theory of why human freedom gave way to increasing oppression since the invention of states - and why this trend began to reverse itself more recently, leading to a rapid expansion of universal freedoms and democracy. Drawing on a massive body of evidence, the author tests various explanations of the rise of freedom, providing convincing support of a well-reasoned theory of emancipation. The study demonstrates multiple trends toward human empowerment, which converge to give people control over their lives. Most important among these trends is the spread of 'emancipative values', which emphasize free choice and equal opportunities. The author identifies the desire for emancipation as the origin of the human empowerment trend and shows when and why this desire grows strong; why it is the source of democracy; and how it vitalizes civil society, feeds humanitarian norms, enhances happiness, and helps redirect modern civilization toward sustainable development.

Democracy and Enlargement in Post-Communist Europe presents the principal findings of a unique in-depth study of the birth of democracy and the market economy in fifteen post-Communist countries. Haerpfer analyses and compares the information collected by the New Democracies Barometer public opinion surveys to provide an overview of the process of democratization across Central and Eastern Europe. This is an extremely valuable resource and will be useful for all those interested in the European Union, comparative politics and democracy and the Communist legacy. It contains data from Belarus, Bulgaria, Croatia, the Czech Republic, Estonia, the Federal Republic of Yugoslavia, Hungary, Latvia, Lithuania, Poland, Romania the Russian Federation, Slovakia, Slovenia and Ukraine.

Many fear that democracies are suffering from a legitimacy crisis. This book focuses on 'democratic deficits', reflecting how far the perceived democratic performance of any state diverges from public expectations. Pippa Norris examines the symptoms by comparing system support in more than fifty societies worldwide, challenging the pervasive claim that most established democracies have experienced a steadily rising tide of political disaffection during the third-wave era. The book diagnoses the reasons behind the democratic deficit, including demand (rising public aspirations for democracy), information (negative news about government) and supply (the performance and structure of democratic

regimes). Finally, Norris examines the consequences for active citizenship, for governance and, ultimately, for democratization. This book provides fresh insights into major issues at the heart of comparative politics, public opinion, political culture, political behavior, democratic governance, political psychology, political communications, public policymaking, comparative sociology, cross-national survey analysis and the dynamics of the democratization process.

This book re-evaluates Almond, Verba, and Pye's original ideas about the shape of a civic culture that supports democracy. Marshaling a massive amount of cross-national, longitudinal public opinion data from the World Values Survey Association, the authors demonstrate multiple manifestations of a deep shift in the mass attitudes and behaviors that undergird democracy. The chapters in this book show that in dozens of countries around the world, citizens have turned away from allegiance toward a decidedly 'assertive' posture to politics: they have become more distrustful of electoral politics, institutions, and representatives and are more ready to confront elites with demands from below. Most importantly, societies that have advanced the most in the transition from an allegiant to an assertive model of citizenship are better-performing democracies - in terms of both accountable and effective governance.

This open access book features various studies on democratization, transformation, political and economic development, and security issues in the Organization for Security and Cooperation in Europe (OSCE) geographical region and beyond. Written by experts and academics in the fields of human rights, security, transformation and development, particularly in post-soviet and communist countries, it examines the status quo of regime development in various member states of the OSCE; their economic, security and human rights performance; institutional reforms and transformations and the challenges that these countries and their societies face, including the USA, Canada, Germany, Macedonia, Russia, Turkey, Kazakhstan, Kyrgyzstan and Mongolia. This is the 2019 edition of this Compilation Series of the OSCE Academy. The OSCE works to promote Minority Protection, Security, Democratic Development and Human Rights guided by the Office for Democratic Institutions and Human Rights (ODIHR), and to enhance securitization and development policies in Eurasia, Europe, Central Asia and North America. Since being founded in 1993, the OSCE and its agencies and departments have attracted a wealth of academic research in various fields and disciplines, ranging from economic development and election monitoring to enhancing global principles of human rights and securitization. About the OSCE Academy in Bishkek: Founded in 2004, the Academy offers post-Doc research fellowships and runs two Master Degrees, one in Economic Governance and Development and one in Politics and Security in Central Asia. The Academy's regular academic programs and conference contributes to developing human professional capital in the sectors of particular importance for Central Asian states and societies. The Academy's graduates and

Belarus is unique among the states of the former Soviet bloc, in that after a decade of transition', the country remains stalled' and backward-oriented. Political and economic changes are characterised by half-measures, and recently a new suppression of dissent has been introduced; the country balances between the prospect of democracy and a retreat to authoritarianism. These developments contrast starkly with the many democratic changes in neighbouring states and suggest a possible alternative path for future development in Eastern Europe. This book provides a thorough overview of current developments in Belarus. It looks at historical, political, economic and social changes, and at international relations, especially relations with Russia and the European Union, considering all these factors both in their domestic and international contexts and defines the type of democracy, if any, which exists in Belarus, exploring the prospects for further democratisation.

NEW YORK TIMES BESTSELLER • “Comprehensive, enlightening, and terrifyingly timely.”—The New York Times Book Review (Editors' Choice) WINNER OF THE GOLDSMITH BOOK PRIZE • SHORTLISTED FOR THE LIONEL GELBER PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Time • Foreign Affairs • WBUR • Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking: Is our democracy in danger? Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die* “What we desperately need is a sober, dispassionate look at the current state of affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that.”—The Washington Post “Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of
