What if we loved ourselves more than we could imagine? We are told to love ourselves, but we don't know how or even why. What if we learned actual techniques that helped us love ourselves and align our energy with our Higher Self and the Universe for a more joyous life? It's possible, and it just takes willingness and practice. When we learn and use real tools, we are better able to surf the waves of life, and meet life with grace. When we learn how we are resisting loving ourselves and learn how to allow the love we are to flow through us, we utilize the buoyant, loving energy of the Universe to flow more smoothly and joyously through life. Everything is energy, including us! When our energy is in balance and flows smoothly, we feel harmonious, peaceful, and aligned with our true nature, our Higher Self, part of the Universe. This is our natural state. Daily life often seems to interrupt our connection with our true state of being. By working with our energy and metaphysical principles, we can remember who we really are; we realign with our true self, which is pure Love, and experience the ease, peace, and joy that results. Metaphysics is about using the energy we are beyond our body in a practical way while we are in this body. By understanding that we are both human and Divine and having compassion for how challenging it is to live in this world, we begin to understand Love, the most powerful force in the Universe. This is not mysterious; this is very real and very available to each of us. The keys to healing are Love and Willingness. The keys are yours for the taking.

Strategy Demystified brings clarity to strategy management. Determining the firm's current position is the first step. Then, figuring out where the leader wants to take the business, based on current and future capabilities and external environmental factors, is the next. Finally, the CEO must prepare the business to implement or execute the plan including having a supportive culture. This last point is overlooked by most organizational leaders; however, it is the prime reason why 70% of change initiatives fail. Most approaches to strategic management take a myopic mechanical view of the process. What is left out is aligning the culture and the people to the goals. Measuring mechanisms like the Balanced Scorecard and Management by Objectives support the alignment of the people and organizational functions. The leader must be involved in the strategic management process. Pieces can be delegated; one person can't be everywhere. But, with delegation there must be accountability. Organizational residents take their cue from the top; so, the leader must demonstrate the importance of strategic management and aligning leadership and culture with the intended destination. Follow the steps in Strategy Demystified and you will arrive at your destination.
