Economics 111 is an introduction to the economic way of thinking about global problems and prospects for trade and the environment. While the intention of the course is to deliver microeconomic principles, all applications and examples will be drawn from the current literature on problems of resource use, the environment, and trade.

~~ECONOMICS 101: Principles of Microeconomics~~

Demand, Supply, and the Supply-Demand relationship. This principle of microeconomics drives any economy and market. We buy some items almost every day, be it food-related, medicines, electronic accessories, and several others. This is 'demand' (not that we are too demanding in our approach). It originates from us.
