## Elevated Work Platforms & Aerial Devices

EMI consists of disruptive electromagnetic energy that transmits from one device to another or from one piece of equipment to another. As we work with electronic system, we apply the principles of electromagnetic compatibility and look for areas that seem vulnerable to EMI. Cellphones, welders, motors, and other equipment generate EMI.

## EMI and Safety: Hazards, Risks, and Designing to Avoid ...

An aerial Lift device is defined as any device, vehicle mounted or manually propelled, telescoping or articulating,
