ETRTO - ETRTO - Pneumatic tyres, rims and valves

The European Tyre and Rim Technical Organisation (ETRTO) exists to specify and harmonise sizes of rims and their associated pneumatic tyres across the European Union. ETRTO sizes apply to rims and tyres for vehicles of all types, including bicycles. The great advantage of ETRTO sizing is that it is unambiguous; previously, nominal dimensions were used which were interpreted in different ways by different countries and manufacturers - a problem for the end user.

ISO 5775 - Wikipedia

Nowadays, bicycle tire sizes should all fall in line with ETRTO's (European Tire and Rim Technical Organization) tire and rim standards. Yet the older English and French tire size markings are still used. An ETRTO size marked 37-622 indicates the width of 37 mm and the tire inner diameter of 622 mm. This designation is clear and allows an unequivocal match with the corresponding rim size.

ETRTO | Schwalbe Tires

The European Tyre and Rim Technical Organisation (ETRTO) exists to specify and harmonise sizes of rims and their associated pneumatic tyre s across the European Union. ETRTO sizes apply to rims for vehicles of all types, including bicycles.

European Tyre and Rim Technical Organisation Standard was introduced by ETRTO (The European Tyre and Rim Technical Organisation). Diameter of wheel tyre bead seat in millimetres preceded by tyre width in millimetres. Tyre width is also a bit non-exact measurement. It is width of an inflated tyre mounted on a rim of standard width for that tyre size.

Retreaded tyres impact of casing and process on retreaded ...
Countless kinds of tires and rims have been made for bicycles. Before tire and rim standards were set by the European Tire and Rim Technical Organization (ETRTO) and adopted c.1970 by the International Standards Organization (ISO), manufacturers in different countries produced their own tire and rim sizes. Most tire and rim sizes are nominal, not always the true measure, just close designations.
