This book contains over 100 classroom-tested projects and ideas taken directly from the pages of The Math Projects Journal, a periodical that for over six years has shared these one-of-a-kind lessons with teachers around the world. MPJs Ultimate Math Lessons offers you 80 innovative lessons and activities that can be immediately implemented in your classroom. Most of these lessons have an accompanying student handout that may be photocopied for use in your classes. To avoid reducing these unique lessons to mere worksheet exercises, the book provides 27 thoughtprovoking articles that will assist you in incorporating math projects in your daily routines and that will challenge the very way in which you think about math education. The lessons in this book have proven to help teachers increase student understanding of mathematics and, in turn, raise student achievement on standardised tests.

Degradation, dehumanization, instrumentalization, humiliation, and nonrecognition – these concepts point to ways in which we understand human beings to be violated in their dignity. Violations of human dignity are brought about by concrete practices and conditions; some commonly acknowledged, such as torture and rape, and others more contested, such as poverty and exclusion. This volume collates reflections on such concepts and a range of practices, deepening our understanding of human dignity and its violation, bringing to the surface interrelationships and commonalities, and pointing to the values that are thereby shown to be in danger. In presenting a streamlined discussion from a negative perspective, complemented by conclusions for a positive account of human dignity, the book is at once a contribution to the body of literature on what dignity is and how it should be protected as well as constituting an alternative, fresh and focused perspective relevant to this significant recurring debate. As the concept of human dignity itself crosses disciplinary boundaries, this is mirrored in the unique range of perspectives brought by the book 's European and American contributors – in philosophy and ethics, law, human rights, literature, cultural studies and interdisciplinary research. This volume will be of interest to social and moral philosophers, legal and human rights theorists, practitioners and students.

In the epic "Penguin Village Wars," Arale and friends must battle the forces of evil: two alien buttheads and a megalomaniac armed with robotic poop. Elsewhere, Senbei's helper robot force-feeds him ramen, a carjacker refuses to ride with bad drivers, and a miniature house controls destinies in the real world. -- VIZ Media
