The ideal "how-to" book! Innovative ideas to increase critical thinking Practical guidelines for family interviewing Clinical tools, skills and examples Breaches the boundaries of practice, education and research Harness the power of the nurse-family relationship! Use the thoroughly revised evidence-based Calgary Family Assessment and Intervention Models to competently and compassionately assess and intervene with families experiencing illness, loss, and/or disability. From theory to practice, polish the skills you need to... Use questions in family interviewing more effectively Conduct a fifteen minute family interview Avoid the three most common errors in family nursing Create genograms for families with multiple unions, parents and siblings Prepare, conduct, terminate, and document family interviews

Focusing primarily on instruments that concern whole family functioning or the functioning of multiple family relationships, FAMILY ASSESSMENT methodically covers measures involving the coding of family interaction, the global rating of family processes, and self-reports of perceptions of family functioning. With the continuity of an authored, rather than an edited text, this authoritative and up-to-date reference encompasses the best current measures in the broad field of family studies, presenting detailed descriptions as well as critical evaluations of selected measures. This innovative work will greatly assist clinicians, researchers, students, and other family scholars in the selection of appropriate measures for research questions or for clinical screening, diagnosis, and treatment evaluation.

Providing practical information and theoretical foundations established on evidence-based methodology, Thomlison's text presents a step-by-step approach to family practice that teaches students to be critical thinkers for the study and practice of family work. case intervention, FAMILY ASSESSMENT HANDBOOK: AN INTRODUCTION AND PRACTICAL GUIDE TO FAMILY ASSESSMENT, Fourth Edition, is based on family systems theory as well as the family and environmental contexts in which family functioning is influenced. Within the family setting, evidence-based interventions are identified for guiding practice decisions. This practical guide illustrates the interplay of family structure and processes, family dynamics, and patterns of interaction to show how those patterns influence family and child development. Harness the power of the nurse-family relationship! Use the thoroughly revised Calgary Family Assessment and Intervention Models to assess families effectively and know when and how to intervene to reduce suffering and promote health.

A practical guide for human service workers and students which describes and shows techniques for use in assessing families. The author reviews a conceptual basis of family assessment in chapters that focus on the family as a system, the family and its environment, and the family life cycle. She goes on to describe such methods of assessment as the ecomap, the genogram, family sculpture, and the use of observation and checklists. Throughout the guide, case examples are used to illustrate concepts and show the techniques in use. A special feature of particular value is the self-teaching exercises designed to give the reader practice in applying these ideas and methods. A concluding chapter relates family assessment to treatment or interventi

Of use to all those professionals involved in the assessment of family situations, this manual is a flexible, practical and holistic guide to conducting family assessments.

How do you keep the whole family in mind when carrying out social work assessment? How do you balance the needs of adults and children? How do you ensure that children's welfare and safety are everyone's priority when families face complex difficulties? Mastering Whole Family Assessment in Social Work brings together what social workers in adult and children services need to know about assessment across both services. With tools and frameworks that make sense of the interface between adult life difficulties, family problems, parenting capacity and children's needs, this practical guide will help social workers to think across professional and administrative divides. Case studies, practice vignettes, exercises and suggestions for further reading are included throughout the book to help the

readers consider the well-being of the whole family when conducting and interpreting assessments. This guide will help social workers to think holistically and work collaboratively both with each other and with families.

Child and Family Assessment is based on Ian Wilkinson's extensive experience of working with troubled children and families over the last twenty years. This completely revised and updated edition of Family Assessment (Gardner Press, 1993) combines a clear summary of current knowledge with practical, detailed and adaptable procedures for practitioner use. Part one reviews the literature on child and family assessment; part two discusses the practical issues involved and provides detailed guidelines for practitioners; a final part examines the relationship between clinical practice, assessment and science with respect to children and families. Written from an eclectic point of view in a clear and precise style, using common sense terms, this book will be an essential guide for all those in the helping professions, including therapists, psychologists, doctors, nurses, social workers and lawyers.

THE FAMILY ASSESSMENT HANDBOOK is a basic practice guide for social work students and beginning human service professionals of "how to" do a family assessment for case intervention. It is based on person-environment (or, family systems) theory, drawing from evidence-based research for guiding practice decisions. This practical book presents the interplay of social work concepts, values, and skill dilemmas presented using case studies from the author's practice experience. By developing a "family journal," students can apply family systems thinking, theory, and concepts. The book is conceptualized as three teaching and learning units: Part One addresses the family systems assessment model; Part Two focuses on self-assessment and critical thinking through exploring the student's family
