21 Jun, by Terry in Uncategorized. We have been working on the book for a number of months now and are excited to announce that we are almost finished! Please stay tuned and watch this website for updates in the coming weeks.

Getting Started With Drones | Build and customize your own ...

I recommend starting out with a quadcopter, a design that typically has an H- or X-shaped frame that provides a good level of stability. Quadcopters generally come with four propellers, sufficient to support a drone of one or two pounds, including in somewhat windy conditions (wind speed up to around 15mph).
