Concrete can be specifically designed to have higher early strengths or higher long-term strengths depending on the construction application. For high early strength concretes, compressive strengths are developed more rapidly (not to be confused with lower setting time). These materials may ideally suit applications such as precast concrete or situations where early age strength for stripping of formwork is required.

High Early And Long Term Strength Concrete | Holcim ...

Holcim high performance concretes provide quality solutions with the latest technology for improving the life of your concrete; designed to meet specific applications and needs of our customers. We also offer standard, decorative and special application concretes to cater for all your concrete needs. Should you wish to discuss your needs please contact your nearest Holcim concrete office.

Lafarge Type I/II Portland cement and slag cement that met all the stringent requirements for strength, resilience and long-term durability.

A stronger, longer-lasting bridge for New York with ...

Engineered for high strength and long-term durability, NewCem slag cement helps achieve greater strength potential and helps control shrinkage, creep and cracking in mass concrete structures. High-strength concrete was the ideal material for meeting the high-priority safety requirements for One World Trade Center because key supporting members—such as elevator and stair enclosures—often relied upon to resist wind, seismic and other impact forces, are designed with an extra measure of ...

One World Trade Center, New York, NY | LafargeHolcim in ...

This cement is relatively fast hardening and gives high strength on medium and long term basis. It has a moderate sulfate resistance and has low alkali. It can be used with a wide range of admixtures. Fields of application. The main fields of applications of this product are: - Works in marine environment or in moderate chemical aggressive environment

The most common use of high-strength concrete is for construction of high-rise buildings. At 969 feet, Chicago's 311 South Wacker Drive uses concrete with compressive strengths up to 12,000 psi and is one of the tallest concrete buildings in the United States. Return to Products.

High-Strength Concrete - Portland Cement Association

At Holcim we provide a range of standard concretes that are designed for residential applications, low rise buildings, paving and driveways. Our concretes are backed by our expertise and tight quality control which brings a guarantee of strength and workability. We provide standardised, premixed concrete that is specified by a standard strength, slump and maximum size aggregate of Normal (N) class N20, N25, N32, N40, N50 with standard slumps of 40-120mm.

Standard concrete | Holcim Australia - Holcim Australia ...

The concrete specimen is concrete cube with the dimension of 15 x. 15 x 15 cm³. From the experiment, the compressive strength of concrete with holcim. PCC cement type II are 53.3 MPa, 53.4 MPa, 53.6MPa and 54 Mpa at 7, 14, 21, and. 28 days after concrete mixture, respectively.

High Strength Concrete Holcim - Indivisible Somerville

Concrete exposed to sea water is susceptible to its corrosive effects. The effects are more pronounced above the tidal zone than where the concrete is permanently submerged and if not adequately designed and specified, the durability of reinforced concrete structural elements exposed to marine conditions can be severely compromised.
