The ICT Development Index is an index published by the United Nations International Telecommunication Union based on internationally agreed information and communication technologies indicators. This makes it a valuable tool for benchmarking the most important indicators for measuring the information society. The IDI is a standard tool that governments, operators, development agencies, researchers and others can use to measure the digital divide and compare ICT performance within and across coun

ICT Development Index - Wikipedia

Community Development through ICTs. As globalization gains momentum, and boundaries, geographical or mental, are becoming increasingly irrelevant, communities face the challenge of maintaining their identity and improving the condition of their members in a changing world. Meanwhile, many functions and responsibilities are being devolved to the local level, as part of moves towards decentralisation and delocalisation.
