Isobars and isotherms are lines on weather maps which represent patterns of pressure and temperature, respectively. They show how temperature and pressure are changing over space and so help describe the large-scale weather patterns across a region in the map. Why do I care? Isobars and isotherms make it easier to read and

2020 8:33:13 AM ET. On a weather map, isobars are contour lines that connect different locations or points with the same constant pressure, while isotherms are also contour lines, which specify locations that are at the same constant temperature. The spacing between temperature contour lines are typically given in 10-degree Fahrenheit
