Who is Steve Wozniak: Apple's engineering genius - Macworld UK

Steve Wozniak sets the record straight on many false facts about repeated Apple lore in this refreshing memoir. Unfettered by the drive of fame and fortune, Wozniak shows how he wanted to make good things and make people's day better.

The high-tech wizard behind Apple offers a personal account of the creation of the first personal computer by marrying computer circuitry with a video screen and a typewriter keyboard to create the affordable, easy-to-use Apple I, detailing his life before and after Apple and providing a personal perspective on an invention that ignited the computer revolution. 50,000 first printing.

I, WOZ offers readers a unique glimpse into the offbeat and brilliant but ethical mind that conceived the Macintosh. After 25 years avoiding the public eye, Steve Wozniak reveals the full story of the Apple computer, from its conception to his views on the iconic cult status it has achieved today. In June 1975 Steve's curiosity and determination inspired him to build a computer, the first Apple. Six months later, he sold the machine, and for the self-professed 'engineer's engineer', success was imminent. But this story is full of life lessons, critical decisions, huge triumphs and big mistakes. Steve speaks also of his childhood, phone hacking pranks, working at Hewlett-Packard, the life-changing plane crash and teaching.

A New York Times Bestseller: "iWoz traces the life and times of a brilliant, gifted...individual whose contributions to the scientific, business and cultural realms are extensive." ▯Bookpage Before slim laptops that fit into briefcases, computers looked like strange, alien vending machines. But in "the most staggering burst of technical invention by a single person in high-tech history" (BusinessWeek) Steve Wozniak invented the first true personal computer. Wozniak teamed up with Steve Jobs, and Apple Computer was born, igniting the computer revolution and transforming the world. In iWoz the mischievous genius with the low profile treats readers to a rollicking, no-holds-barred account of his life!for once, in the voice of the wizard himself.

Steve Wozniak grew up with an insatiable curiosity that his father, a programmer, helped fuel. After being accepted to the University of Colorado Boulder, Steve was quickly expelled for hacking into the college' computer system. He then got a job at Hewlett-Packard where he met Steve Jobs. Together, the two Steves created the Apple Computer company. Steve Wozniak's job at Apple was to program the computers to be programmable, compact, and fast, which was no easy feat when most computers at the time filled a room. Steve Jobs's role was to market and sell the new computers. Woz, as his friends called him, single-handedly designed and programmed the hardware, circuit boards, and operating system for the Apple I. Slowly, the tech world caught up to him and the personal computer was born.

Describes the development of the Apple Macintosh through a variety of anecdotes, photographs, and sketches.

After 25 years of avoiding the public eye, Steve Wozniak breaks his silence and tells the full story of the Apple computer, from its conception to his views on the iconic cult status it enjoys today. But for Steve's dream to build himself a computer, Apple would never have happened. In June, it was just an idea. By that Christmas, he'd built something that his friend convinced him to sell, just for fun. The rest, as they say, is history. But this history is full of life lessons, critical decisions, huge triumphs and big mistakes, and all from a self-professed 'engineer's engineer'. Steve talks about his childhood, phone hacking pranks, working at Hewlett-Packard, the life-changing plane crash and teaching. I, WOZ offers readers a unique glimpse into the offbeat and brilliant but ethical mind that conceived the Macintosh. With the help of award-winning journalist Gina Smith, Steve sets the record straight.

No one answers more computer questions from first-time buyers than Gina Smith and Leo Laporte. Now you can get all those answers in one place, in an entertaining format that will make you laugh while you learn. Over the past decade Gina and Leo have talked with thousands of computer users on TV, radio, and in the newspaper. They're famous around the world for making computers easy to understand. In this book, they answer the questions people ask most often with simple, jargon-free language.

An examination of one of the greatest success stories of the digital age looks at the success Steve Jobs has had with Pixar and his rejuvenation of Apple through the introduction of the iMac and iPod.

Revealing the real Steve Jobs, the mother of his first child paints an intimate portrait of an idealistic young man who was driven to change the world, who denied his own child and who mistook power for love. 100,000 first printing.
