Modern pterosaurs in North America. Two sightings of Rhamphorhynchoid pterosaurs in eastern Cuba in the mid-20th century, one by Patty Carson and one by Eskin Kuhn. . Living pterosaurs (or pterodactyls) in California.

Live Pterosaurs in America – Non-fiction cryptozoology ...

Live Pterosaurs in America. Americans, for years, have reported obvious living pterosaurs, with sightings in Washington state, California, New Mexico, Texas, Ohio, Arkansas, Oklahoma, Georgia, Florida, South Carolina, Rhode Island, Maine, New York, Pennsylvania, Kentucky, Virginia, Kansas, Indiana . . . [etc]”.

Cryptozoology and Pterosaurs Living in the United States

More shocking, these giant long-tailed flying creatures are not confined to the southwest Pacific: They are seen in the contiguous United States of America. Most pterosaurs in North America, however, are smaller, with many wingspan estimates at less than fifteen feet; nevertheless, how shocking! What amazing encounters!

Live Pterosaurs in America: Not extinct, flying creatures ...

I've been investigating sightings of these flying creatures for sixteen years now, reported encounters with apparent living pterosaurs. Most of them have been in the United States. The estimated number of sightings suggests that ancient legends of dragons, seen around the world, may not have been based entirely on fictional accounts.

How many people see living pterodactyls? – Live Pterosaurs ...

According to the third edition of the book **Live Pterosaurs in America**, by Jonathan Whitcomb: Chapter One “Susan Wooten was driving east on Highway 20, to the town of Florence, [South Carolina] on a clear mid-afternoon in the fall of about 1989, following a girl who lived in her dorm, who was driving ahead.

Live Pterosaur

[Update: the second edition of **Live Pterosaurs in America**, published late in 2010, has a whole chapter about the Marfa Lights.] Of course not all these “ghost lights” need be from the same source, and even in one area, unidentified lights need not all be from the same source (Yakima in particular, according to the book).

ghost – Live Pterosaurs in America

Live Pterosaurs in America is a collection of alleged eyewitness accounts as well a personal history of the authors journey into the question of whether flying reptiles heretofore believed long extinct, are still flying around.

With a long neck, a long head, a head crest, and an 8-10 foot wingspan, it was no bat. And it was not in Papua New Guinea but in the Western United States. Pterosaurs Alive, Not Extinct. Part of the problem is the breadth of the belief in absolute extinction of all species of pterosaurs.

Live Pterosaurs - Home

Live Pterosaurs in America From the title page of this nonfiction cryptozoology book: “Since the two ropen expeditions of 2004, in Papua New Guinea, more Americans have learned of the living-pterosaur investigations and the many resulting eyewitness interviews. . . . The author [Jonathan Whitcomb], one of those American explorers

Publications About Living Pterosaurs

Some of them have their experiences documented in the nonfiction book Live Pterosaurs in America. Most of them do not call them “flying dinosaurs,” but they know the meaning of the phrase. The “flying dinosaur” of Papua New Guinea is often called “ropen.” It seems to be a large Rhamphorhynchoid pterosaur, far larger than any of the fossils of those long-tailed Rhamphorhynchoids known, at least into the beginning of the twenty-first century.

Flying Dinosaurs - Home

Live Pterosaurs in America | Encounters with living pterosaurs Live “pterodactyls?” In the United States? Many scientists have long assumed all pterosaurs died millions of years ago. Now take a whirlwind tour of many years of investigations in cryptozoology, and prepare for a shock: At least two species of pterosaurs have survived, uncommon, not so much rare as widely, thinly distributed.
