NComputing vSpace software runs on the host system and enables the connection to the remote device. This user is the only one accessing the computer at a time. A user could also extend this to enable access to multiple hosts from a single location provided each host is licensed and the user is the primary user of each host device.

Windows Multi-User Licensing | NComputing

For 17 years NComputing has pursued the idea of affordable, high performing desktop virtualization solutions. Our innovative and award-winning technologies serve customers large and small, in diverse markets, with varying use cases—from a solar-powered internet café in Zambia to a highly secure environment at the U.S Department of Defense.
