What if we could learn to accept I don't know and embrace the possibility that the future is full of mystery, excitement, and unlimited opportunity? The Art of Uncertainty is an invitation to the reader to consider its essential message: learning to love the unknown by staying present in the moment. If the difficulties of recent years have taught us anything-particularly those who "did everything right" and still saw it all fall apart-it's that none of us has as much control over our lives as we believe. The only thing we can control is our next thought. What if we could learn how to be at peace with uncertainty and embrace the possibility that the future is full of mystery, excitement, and unlimited opportunity? What if we discovered that a new paradigm can be more fulfilling, more rewarding, and more peaceful than what we have known? Living in the I don't know and loving it is an art form we can all master, and The Art of Uncertainty is the perfect guidebook.

Organotin compounds, used as antifouling biocides since 1960, are chemical compounds that act as endocrine disrupters. It is not known how organotin compounds cause hormone disturbance, however, and many questions remain about their effect on aquatic organisms. Studies on organotin compounds have recently evolved, with many new findings reported. Following a worldwide ban on organotin compounds in 2008, alternative compounds will mainly be used, with the potential for coastal areas to become contaminated, causing, among other effects, cholinesterase inhibition in aquatic organisms. Use of alternative compounds must be controlled to avoid such errors. These and other findings are described and concisely summarized in this book, providing a useful reference in countries where alternative biocides are being considered. Included are studies on the effects on marine organisms, making this book an excellent aid to experts in environmental chemistry, to government organizations, and to students.

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

This book gathers papers presented at the International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD-2018), which was held in Tangiers, Morocco on 12-14 July 2018. In addition to the latest research in the field of energy, it offers new solutions, tools and effective techniques, and provides essential information on smart grids, renewable and economical energy. Further, it addresses modeling, storage management and decision support in the field of energy, offering a valuable guide for researchers, professionals and all those who are interested in the development of advanced intelligent systems in the energy sector.

The nature of ethics has been the subject of much controversy and argument in recent decades. Theological Ethics and Global Dynamics tackles these various debates, offering a wide-ranging, comprehensive, and provocative statement of the nature of theological ethics in global times. Offers an accessible, lively, and provocative statement of the nature of moral philosophy and theological ethics in contemporary times. Tackles various perspectives on debates about distinctly Christian ethics. Argues that we need to reframe the arena in which moral questions are asked. Engages a range of positions, exploring distinctively modern issues such as moral and cultural relativism, globalization, problems of consumption and violence, and religious pluralism. Addresses the complexity of certain ethical decisions, which are difficult and far from clear-cut, and yet presents an ethical understanding which is both humane and deeply religious.

Read along with Disney! When Bob tells the pups they're going to help out at the local pet adoption event, Adopt-a-palooza, Bingo and Rolly can't wait to go. But when an energetic little puppy runs away, Bingo and Rolly make it their mission to bring him back....and then help him find the perfect pet owner to call his own!

Fiat's first agricultural tractor was presented to the civil and military authorities of Turin in 1918 and marketed the following year by the Federation of Agricultural Consortia. This book uses original photographic documentation to illustrate the origins and development of the company's agricultural products, tackling the technical and human aspects of a story that has seen the introduction of over 500 models since 1918. This is the first comprehensive study of the Turin-based firm's history in the agricultural sector. This updated edition includes all the new Holland new series presented from 2008 up to 2011.
