Organizational Assessment: A framework for improving performance

Robust organizational capacity is a company s potential to apply its skills and resources to accomplish goals and exceed stakeholders expectations. This book provides readers with the ability to diagnose both the drivers of change in their organization and the type of change response needed. In addition to the traditional tangible dimension of change, it presents a framework to leverage the cultural and personal dimensions of change to sustain successful change initiatives. As well, it presents an organizational capability self-assessment process to derive the maximum return on change efforts and investments. CEOs and executives will benefit from the ability to link demands for change to organizational capabilities in strategic initiatives.

Transform Your Organization by Scaling Leadership How do senior leaders, in their own words, describe the most effective leaders—the ones that get results, grow the business, enhance the culture and leave in their wake a trail of other really effective leaders? Conversely, how do senior leaders describe the kind of leader that undercuts the organization's capacity and capability to create its future? This book, based on groundbreaking research, shows how senior leaders describe and develop leadership that works, that does not, that scales, and that limits scale. Is your leadership built for scale as you advance in today's volatile, uncertain, dynamic, and disruptive business environment? This context puts a premium on a very particular kind of leadership—High-Creative leadership capable of rapidly growing the organization while simultaneously transforming it into more agile, innovative, adaptive and engaging workplace. The research presented in this book suggests that senior leaders can describe the High-Creative leadership with surprising clarity. They also describe with equal precision the High-Reactive leadership that cancels itself out and seriously limits scale. Which type of leader are you? You scale your leadership by increasing the multiple on your leadership in three ways. First, by developing the strengths that differentiate the most effective leaders from the strengths deployed by the most Reactive and ineffective leaders. And second, by increasing your leadership ratio—the ratio of most the effective strengths to the most damaging liabilities. Third, by developing High-Creative leaders all around you. Scaling Leadership provides a proven framework for magnifying agile and scalable leadership in your organization. Scalable leadership drives forward-momentum by multiplying high-achieving leaders at scale so that growth, productivity and innovation increase exponentially. Creative leaders multiply their strengths beyond technical competence by leading in deep relationship, with radical humanity, passion and integrity. Drawing upon decades of solid research and experience enhancing individual capability and collective leadership effectiveness with Fortune 500 companies and government agencies, the authors provide an innovative and efficient framework to help you: Take stock of your own personal balance of leadership strengths and weaknesses Scale your leadership in deep relationship and high integrity Proliferate high-achievers throughout your organization's leadership system Identify ineffective leadership and course-correct quickly Transform your organization by transforming leadership Scaling Leadership is an invaluable tool for executives, managers, and leaders in business, academia, nonprofit organizations, and more. This innovative resource provides effective techniques, real-world examples, and expert guidance for organizations seeking to improve performance, align and execute strategies, and transform their business with scalable leadership capability.

Health program managers everywhere grapple with the same challenges: Tackling complex health problems with limited resources. Defining priorities. Inspiring staff. Initiating change. Demonstrating measurable results. Managers Who Lead empowers health managers at all levels of an organization to lead teams to face challenges and achieve results. It answers questions such as: How do I create a shared vision of better health and a clear plan for achieving it? What can I do to improve work climate? How can I prepare myself and others for higher levels of responsibility? How do I lead change inside and outside my organization? Whether you work in the public or private sector, this handbook is essential reading. It offers a wealth of resources, including exercises for managers and facilitators. Real-life examples illustrate how to transform your work groups and organizations into high performers.

In this revised and updated third edition, Carver continues to debunk the entrenched beliefs and habits that hobble boards and to replace them with his innovative approach to effective governance. This proven model offers an empowering and fundamental redesign of the board role and emphasizes values, vision, empowerment of both the board and staff, and strategic ability to lead leaders. Policy Governance gives board members and staff a new approach to board job design, board-staff relationships, the role of the chief executive, performance monitoring, and virtually every aspect of the board-management relationship. This latest edition has been updated and expanded to include explanatory diagrams that have been used by thousands of Carver's seminar participants. It also contains illustrative examples of Policy Governance model policies that have been created by real-world organizations. In addition, this third edition of Boards That Make a Difference includes a new chapter on model criticisms and the challenges of governance research.

The purpose of this Research Topic is to share the latest developments in the methods and application of implementation science. Briefly, implementation science is the study of methods to promote the adoption and integration of evidence-based practices, interventions, and policies into routine health care and public health settings. Implementation research plays an important role in identifying barriers to, and enablers of, effective health systems programming and policymaking, and then leveraging that knowledge to implement evidence-based innovations into effective delivery approaches.

The main objective of the tool is to propose a harmonized, objective and consensual basis to analyse the performance of a national food control system. It is intended to be used by countries as a supporting basis for self-assessment to identify priority areas of improvement and plan sequential and coordinated activities to reach expected outcomes, and by repeating the assessment on a regular basis, countries can monitor their progresses. The Tool is based on Codex principles and Guidelines for National Food Control Systems as well as other relevant Codex guidance for food control systems, which are referenced throughout the document. Its scope is given by the dual objectives quoted in Codex guidance for these systems: protect health of consumers and ensure fair practices in the food trade. This introductory volume presents the FAO/WHO Food Control System Assessment Tool, providing background to its development and outlining its main scope and objectives. It presents a thorough review of the assessment Tool structure, breaking it down into its constitutive elements (dimensions, sub-dimensions, competencies and assessment criteria). Finally, it gives an overview of the assessment approach, from the ratings to the descriptive analysis supporting the allocation of scores. The volume also contains a glossary of useful terms and the list of Codex documents referenced in the Tool.

This book is based on an important but complicated question: How have nonprofit human service organizations sustained themselves over time? It documents the organizational histories of pioneering nonprofits that have unique missions and significant longevity – in one case, 157 years. This volume provides one of the few documented histories of nonprofit human service organizations and includes a cross-case analysis of the major themes that help to expand our understanding of organizational lifecycles with respect to organizational growth and resilience. The major themes appear in the form of clusters of organizations that are exemplars of: leadership (experiences of either founding or long-term executive directors); internal operations (capacity to respond to changing community needs); and external relations (capacity to develop unique and/or sustained relationships with funding sources and/or donor populations). These cases also provide students of nonprofit management with opportunities for case-based learning that complements the more time-limited and episodic teaching cases which rarely provide learners with a longitudinal perspective of nonprofit organizations. This book was originally published as a special issue of the Journal of Evidence-Based Social Work.
