Enterprise Resource Planning (ERP) by Alexis Leon – In print for over two decades, continues to be a one-stop reference on the subject covering Basic Concepts, Benefits and Risks, ERP Related Technology, ERP Implementation Process, ERP Deployment Models, ERP Operations and Management, E-Business in ERP, and Future Directions in ERP. It is developed to be used as a conceptual resource for the students pursuing Management and Computer Science courses; and as a reference for the ERP Professionals. This book also examines enterprise software and shows the readers how ERP software can refine the operations of a company, how it can streamline its various overlapping functions, and how the core areas of any ERP package are related to each other. This fourth edition is substantially revised to keep pace with advances in ERP to provide a thorough introduction to the world of ERP and prepare the readers for a concrete understanding of today's ERP marketplace. Highlights: • Content presentation supports outcomes-based Learning approach • 12 case studies on ERP software included, like: ♦SAP at Coca Cola Hellenic Bottling ♦3i Infotech at Faber-Castell India ♦Epicor at Knightsbridge Chemicals ♦Epicor at Howe Corporation ♦Ramco at Adani Logistics Ltd. ♦IQMS at Custom Profile ♦Sage at Agarwal Fasteners Pvt. Ltd. ♦Oracle JD Edwards at AVU Carbon India • Inclusion of contemporary topics like Business Intelligence, Business Analytics, e-Commerce, m-Commerce, Data Warehousing, Data Mining, SaaS and Cloud ERP with their Market Dynamics • Coverage on ERP Software like SAP, Infor, Epicor, QAD, 3i Infotech, Sage, Oracle etc. • Inclusion of functional features of SAP – Sales and Distribution, Controlling, Financial Integration, HCM, Production Planning, Quality Management. • Extensive pedagogical aid at the end of each chapter is provided.

Businesses must constantly adapt to a dynamically changing environment that requires choosing an adaptive and dynamic information architecture that has the flexibility to support both changes in the business environment and changes in technology. In general, information systems reengineering has the objective of extracting the contents, data structures, and flow of data and process contained within existing legacy systems in order to reconstitute them into a new form for subsequent implementation. Information Systems Reengineering for Modern Business Systems: ERP, Supply Chain and E-Commerce Management Solutions covers different techniques that could be used in industry in order to reengineer business processes and legacy systems into more flexible systems capable of supporting modern trends such as Enterprise Resource Planning (ERP), supply chain management systems and e-commerce. This reference book also covers other issues related to the reengineering of legacy systems, which include risk management and obsolescence management of requirements.
