SELOC Marine maintenance and repair manuals offer the most comprehensive, authoritative information available for outboard, inboard, stern-drive and diesel engines, as well as personal watercraft. SELOC has been the leading source of how-to information for the marine industry since 1974. Designed and written to serve the needs of the professional mechanic, do-it-yourself boat enthusiast, instructor and student, these manuals are based on actual teardowns done by Chilton Marine's editors/authors in our on-site facility. Providing complete coverage on everything from basic maintenance to engine overhaul, every manual features: -Simple-to-follow, step-by-step, illustrated procedures -Hundreds of exploded drawings, photographs and tables -Troubleshooting sections, accurate specifications and wiring diagrams -Recognized and used by technical trade schools as well as the U.S. military Covers all GS, GSI, GSX, GTI, GTS, HX, SP, SPI, SPX and XP models.

The story of the company that was founded by the inventor of the snowmobile In 1942, Joseph-Armand Bombardier invented the snowmobile and founded his company to manufacture them. From its humble beginnings as an entrepreneurial company in rural Quebec, led by an enterprising inventor, Bombardier Inc. has emerged as a global leader in the transportation industry. This book tells the fascinating tale of this remarkably well managed company that has enjoyed spectacular growth in its chosen markets through strong leadership and management strategy, succession planning, strategic diversification, and turnaround and acquisition artistry. The fascinating story of the world's largest rail manufacturer for both railway and subway Reveals why Bombardier Inc. is a multi-faceted global company yet nobody knows their name Written by Larry MacDonald the author of Nortel Network The Bombardier Story shows how invention and entrepreneurship, management and leadership, smooth succession planning, and turnaround and acquisition built this global powerhouse.

SELOC Marine maintenance and repair manuals offer the most comprehensive, authoritative information available for outboard, inboard, stern-drive and diesel engines, as well as personal watercraft. SELOC has been the leading source of how-to information for the marine industry since 1974. Designed and written to serve the needs of the professional mechanic, do-it-yourself boat enthusiast, instructor and student, these manuals are based on actual teardowns done by Chilton Marine's editors/authors in our on-site facility. Providing complete coverage on everything from basic maintenance to engine overhaul, every manual features: -Simple-to-follow, step-by-step, illustrated procedures -Hundreds of exploded drawings, photographs and tables -Troubleshooting sections, accurate specifications and wiring diagrams -Recognized and used by technical trade schools as well as the U.S. military Covers Type 1, Alpha/MR and Bravo I and II units powered by Ford and GM 4-cylinder, in-line 6, V6 and V8 engines. Over 1,430 illustrations

This is a resource-based view of the firm, incorporating 17 case studies which reflect this emphasis. Case studies new to this edition cover high profile companies, globally competitive industries, entrepreneurial businesses and public companies, and there is a guide to case analysis showing students how to approach case analysis. Also new to this edition is coverage of co-operative strategies, collaborative alliances and competing in high velocity market environments. The book includes company website addresses, with details on how to use the Internet and various online services.

Mergers and Acquisitions: Text and Cases provides guiding frameworks and information on Mergers and Acquisitions (M&A), complemented by a set of well-matched cases. The purpose is not to rehash the existing set of M&A books, but to provide real-world examples of situations that allow the reader to utilize the core concepts and processes in M&A. The authors present a process-based framework of M&A, within which the reader is given in-depth information about the steps in doing deals. The reader then has the ability to apply these concepts and frameworks to the full-length cases. The book can be used as a stand-alone text because it provides good coverage of the entire M&A process. In order to more specifically focus on any particular aspect of M&A, the text can easily be supplemented with focused materials.

Covers all 1 1/4-60 HP, 1 and 2-cylinder 2-Stroke Models.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

SELOC Marine maintenance and repair manuals offer the most comprehensive, authoritative information available for outboard, inboard, stern-drive and diesel engines, as well as personal watercraft.
