neglecting those concerns, American Photojournalism emphasizes the why.

The older paradigm for photojournalists was to simply record events, with the hope and frequently the expectation that people and their governments would be moved to respond to the injustices pictured; as witnessed by the impact of certain images during the Civil Rights movement and the Vietnam War. Given evolving media and political climates, however, including the billions of images now available online from all kinds of sources, the purpose and effectiveness of media, in particular of visual journalism, has been called into question. *Bending the Frame: Photojournalism, Documentary, and Citizenship*, by author and critic Fred Ritchin, addresses the

new and emerging potentials for visual media to impact society. Ritchin examines the historical and contemporary uses of photography and related media to inspire social change. From the unintended consequences of citizen journalism and leaked images such as those from Abu Ghraib, to the new strategies by visual journalists and the targeted human rights projects by documentary photographers, the intention of this book is to provide a much-needed critical approach to the issues involved in such efforts. Also encompassing online efforts, uses of video, and a diverse range of books and exhibitions, *Bending the Frame* aims for as wide-ranging and far-reaching a discussion as possible, asking the critical question: how can images promote new thinking and make a difference in the world?

The Tiananmen Square massacre, the Kent State shootings, the Kennedy assassination, the civil rights movement - these events have been indelibly etched in the minds of Americans through the work of photojournalists. In *Truth Needs No Ally*, Howard Chapnick, one of the giants of contemporary photojournalism, offers a historical, philosophical, pragmatic, and inspiring look at the profession. From the exhilarating early years of LIFE and Look magazines, through the explosion of photographic technology, Howard Chapnick takes us through the fascinating history of documentary photography. With dozens of photographs - many in color - representing photographic journalism at its best, *Truth Needs No Ally* is the definitive book on photojournalism by a master of the craft.

a cool, detached professional and a sensitive, involved citizen. The taking of pictures is much more than F-stops and shutter speeds. The printing of pictures is much more than chemical temperatures and contrast grades. The publishing of pictures is much more than cropping and size decisions. A photojournalist must always be aware that the technical aspects of the photographic process are not the primary concerns." This book addresses ethics in photojournalism in depth, with sections on the philosophy in the discipline, on pictures of victims or disaster scenes, on privacy rights and on altering images. As important and interesting today as when it was first in print.
