Abstract. This study aimed to evaluate the presenting symptoms, the effectiveness of imaging methods, and the surgical treatment of vascular rings. Data for 44 patients (32 enrolled prospectively, 12 reviewed retrospectively) over a 10-year period in a tertiary referral center were analyzed. These patients comprised 25 patients with a left aortic arch and an aberrant right subclavian artery, 13 patients with a right aortic arch and a left subclavian artery originating from Kommerell's ...
