Rapid gender assessments of 12 projects in four countries were undertaken as part of the Asian Development Bank's commitment to improving aid effectiveness. The assessment of three loans in Viet Nam found that positive gender equality results were achieved due to the implementation of gender action plans. Gender action plans were effective tools for ensuring that both women and men participated in and benefited from projects. Gender equality results and gender action plans contributed directly to achieving loan outcomes and improved project effectiveness. This report discusses the gender equality results achieved for each project, summarizes factors that enhanced the quality of project design and implementation, and makes recommendations to maximize gender equity as a driver of change.

The global community has committed to elimination of mother-to-child transmission, or vertical transmission, of HIV, syphilis and hepatitis B virus (HBV) as a public health priority and reducing global disease burden, quality reproductive, maternal and child health services to a level no longer a public health concern. Achieving and maintaining elimination requires strong political and public health commitment. Strengthened, resilient health systems improve a broad range of services and outcomes while similarities in prevention interventions add to the benefit of an integrated approach. Validation is an attestation that a country has successfully met standard criteria for elimination, or for being at one of the 3 levels of achievement on the "Path to Elimination" while delivering quality services for women, girls and their children, through the life-course, respecting human rights and ensuring gender equality and community engagement. It requires systems that comprehensively identify and monitor new

infections and infant outcomes. Establishment of criteria for validation began in 2007 with global consultations while lessons learnt advised publication of 2 editions of global guidance on criteria and processes for validation: elimination of mother-to-child transmission of HIV and syphilis (the "Orange Book"). This document, the third version, adds on EMTCT of HBV, bringing together a package of interventions and metrics to support integrated management and monitoring of vertical transmission across a wide range of epidemiological and programmatic contexts.

Admittedly women's perspectives are not much reflected in the discourse and agenda development planning and interventions. Due to lack of research there is tremendous scarcity of information about social condition of women among various Indian communities. This book is solely devoted to examine the social situation of Muslim Women of India in general and the state of West Bengal in particular. The situation of Muslim women of West Bengal, specially of Northern region of this State has been described in details. The present study seeks to explore: Role and status of Muslim women as well as their problems and prospects, Quality of Socio-economic life of the Musliilm women and the extent of changes that have occured among them, and Problems the Muslim women face towards their empowerment under contemporary changing world order. The book also highlights some of the plicy implications of major findings of the study. With its original data and fresh theoretical perspective the book will serve the interest of social scientists, policy makers and women activists.

First published in 1985, the Handbook for Achieving Gender Equity Through Education quickly established itself as the essential reference work concerning gender equity in

Online Library Revisions Gender And Uality In Late Modernity

education. This new, expanded edition provides a 20-year retrospective of the field, one that has the great advantage of documenting U.S. national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX, the landmark federal law prohibiting sex discrimination in education, equity programs and research. Key features include: Expertise □ Like its predecessor, over 200 expert authors and reviewers provide accurate, consensus, research-based information on the nature of gender equity challenges and what is needed to meet them at all levels of education. Content Area Focus □ The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters including mathematics, science, and engineering. Global/Diversity Focus □ Global gender equity is addressed in a separate chapter as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latina/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students. Action Oriented □ All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education. New Material □ Expanded from 25 to 31 chapters, this new edition includes: *more emphasis on male gender equity and on sexuality issues; *special within population gender equity challenges (race, ability and disability, etc); *coeducation and single sex education; *increased use of rigorous research strategies such as meta-analysis showing more sex similarities and fewer sex differences and of evaluations of implementation programs; *technology and gender equity is now treated in three

Online Library Revisions Gender And Uality In Late Modernity

chapters; *women's and gender studies; *communication skills relating to English, bilingual, and foreign language learning; and *history and implementation of Title IX and other federal and state policies. Since there is so much misleading information about gender equity and education, this Handbook will be essential for anyone who wants accurate, research-based information on controversial gender equity issues—journalists, policy makers, teachers, Title IX coordinators, equity trainers, women's and gender study faculty, students, and parents.

Changes in the work sphere and the "vanishing" of standard work may end the old breadwinner type of masculinity. But where "new men" try to balance work and life or show caring activities, they face obstacles - in organisations as well as on playgrounds. The book explains the ongoing changes in detail, shows ways how men deal with them and gives recommendations how to achieve gender equality by including a perspective on men.

Principles of Gender-Specific Medicine examines how normal human biology differs between men and women and how the diagnosis and treatment of disease differs as a function of gender. This revealing research covers various conditions that predominantly occur in men, and as well conditions that predominantly occur in women. Among the subjects covered are cardiovascular disease, mood disorders, the immune system, lung cancer as a consequence of smoking, osteoporosis, diabetes, obesity, and infectious diseases. * Gathers important information in the field of gender-based biology and clinical medicine, proving that a patient's sex is increasingly important in preventing illness, making an accurate diagnosis, and choosing safe and effective treatment of disease * Addresses gender-specific areas

Online Library Revisions Gender And Uality In Late Modernity

ranging from organ transplantation, gall bladder and biliary diseases, to the epidemiology of osteoporosis and fractures in men and women * Many chapters present questions about future directions of investigations

Achieving gender equality remains a significant challenge, that has only deepened with the on-set of the COVID-19 pandemic. Gender budgeting (GB) can help promote gender equality by applying a gender perspective to fiscal policies and the budget process. This paper takes stock of GB practices in G20 countries and benchmarks country performance using a GB index and data gathered from an IMF survey. All G20 countries have enacted gender focused fiscal policies but the public financial management (PFM) tools to operationalize these policies are far less established. We find that notwithstanding heterogeneity across countries, the average G20 level of GB practice is relatively low. More progress has been made establishing GB frameworks and budget preparation tools than with budget execution, monitoring and auditing. Too few countries assess the upfront impact of policies on gender and/or evaluate ex-post the effectiveness of policies and programs. Where GB features are in place, they tend to operate as an "add-on", rather than a strategic and integral part of resource allocation decisions. Progress with GB does not appear to be dependent on the level of country development. Key to future efforts will be harnessing opportunities for integrating GB tools into existing PFM systems and more closely linking GB initiatives with PFM reforms.

revision. Key content coverage is combined with exam practice questions and practical tips to create a revision guide that students can rely on to review, strengthen and test their knowledge. With My Revision Notes every student can: - Plan and manage a successful revision programme using the topic-by-topic planner - Consolidate subject knowledge by working through clear and focused content coverage - Test understanding and identify areas for improvement with regular revision tasks - Improve exam technique through practice questions and tips - Learn and use key terms for each topic

"This breathtakingly broad, interdisciplinary reader demonstrates how widely feminist thinking has spread, how deeply it has shaken settled assumptions in the disciplines and how much new light it throws on contemporary controversies." - Myra Marx Ferree, University of Wisconsin-Madison "A timely intervention and highly engaged, thoughtful and scholarly analysis of the state of gender and women's studies in the West by three eminent feminist scholars... Highly cognisant of the central issues that have fractured, blocked and enhanced western feminism." - Bev Skeggs, Goldsmiths "The comprehensiveness and the interdisciplinary range of themes are impressive, and they make the Handbook into a wonderful tool for teachers and students of women's and gender studies." - Nina Lykke, Linköping University Gender and women's studies is one of the most challenging fields within the social sciences - the dynamics of gender relations and the social and cultural implications of gender constructions offer a lively forum of debate. The Handbook of Gender and Women's Studies presents a comprehensive and engaging review of the most recent developments within the field, including the study of masculinity, the feminist implications of postmodernism, the

Online Library Revisions Gender And Uality In Late Modernity

“cultural turn” and globalization. The authors review current research and offer critical analyses of women’s and gender studies in work, the welfare state, family, education, religion, violence and war and feminist global politics. Edited by three leading academics from Europe and the United States, and with 25 chapters written by scholars based throughout the world, the Handbook situates the most important debates in the field within a uniquely international and interdisciplinary context. The Handbook is a useful introduction to gender theory and an exciting starting-point for fresh debates.
