A follow-up to his best-selling E-Learning, Beyond E-Learning explains the most current thinking on how organizations learn and apply what they know to be successful, and explores the increasingly important role that technology plays, not as an end in itself but as a vital means to get there. The book also provides a clear path for helping to integrate learning—including e-learning—knowledge management, and performance support, and will help training professionals and the organizations they serve go beyond common myths and misconceptions about training and e-learning, focus training/learning activities directly on organizational know-how, and implement a framework that can (at last) be a catalyst for true organizational learning.

prevalent methods of constructing buildings in North America and an increasingly significant method of construction in Europe and the rest of the world. Timber Engineering deals not only with the structural aspects of timber construction, structural components, joints and systems based on solid timber and engineered wood products, but also material behaviour and properties on a wood element level. Produced by internationally renowned experts in the field, this book represents the state of the art in research on the understanding of the material behaviour of solid wood and engineered wood products. There is no comparable compendium currently available on the topic - the subjects represented include the most recent phenomena of timber engineering and the newest development of practice-related research. Grouped into three different

management. The first part of the book explores practical issues in governance and the application of Islamic governance in new areas such as quality management systems and the tourism industry, while the second delves into questions of sustainability. The book proposes a new Islamic sustainability and offers new perspectives on CSR in connection with waqf (Islamic endowments) and microfinance. The third part of the book addresses Islamic values and how they are applied in entrepreneurship, inheritance, consumer behavior and marketing. The fourth part examines the issues of waqf and takaful (a form of insurance in line with the Islamic laws), while the fifth discusses the fiqh (the study of Islamic legal codes) and legal framework from the perspectives of entrepreneurship, higher education, reporting and inheritance (wills). The final chapter is dedicated to
