Test Equating and linking are usually straightforward with Winsteps, but do require clerical care. The more thought is put into test construction and data collection, the easier the equating will be. Imagine that Test A (the more definitive test, if there is one) has been given to one sample of persons, and Test B to another.

Test equating traditionally refers to the statistical process of determining comparable scores on different forms of an exam. It can be accomplished using either classical test theory or item response theory. In item response theory, equating is the process of placing scores from two or more parallel test forms onto a common score scale. The result is that scores
