"This is an excellent reference for those caring for clients with HIV/AIDS. I strongly recommend this book." --Doody's HIV/AIDS is no longer a certain death sentence. Patients fighting the chronic symptoms of HIV/AIDS are now living longer, fuller lives due to recent scientific and pharmaceutical breakthroughs. As a result, the new generation of caregivers must keep pace with cutting-edge, evidence-based practices to better serve patients who may live with HIV/AIDS for several decades. This updated edition is a vital resource for nurses and other health care professionals providing care to HIV-positive persons in the 21st century. The contributors present essential information on the medical assessment and management of symptoms, the prevention of infection, ethical and legal dimensions of care, and much more. With a greater emphasis on the international dimensions of the HIV pandemic and the treatment of minority populations, this book serves as an essential guide for nurses and health care practitioners serving patients with HIV/AIDS. Key topics include: HIV screening, testing, and counseling HIV/AIDS nursing case management within the global community HIV and gay, lesbian, bisexual, and transgender persons Children and HIV prevention and management HIV in corrections facilities and the care of incarcerated patients Sex workers and the transmission of HIV

" What Nurses Know\u00c2\u00a0HIV/AIDS provides up-to-date, reliable and practical health information for people living with HIV and their significant others. In easy-to-understand everyday language the authors give information to help individuals with HIV navigate the healthcare system, covering everything from receiving an initial HIV test to becoming an engaged member of their healthcare team, knowledgeable and actively involved in their healthcare decisions. The authors include vignettes based on their real-life experiences that speak to the individual with aids. However, they approach HIV in a holistic manner and write not for the individual with HIV, but also their friends, family, and community. What Nurses Know Series: Nurses hold a critical role in modern health care that goes beyond their day-to-day duties. They share more information with patients than any other provider group, and are alongside patients twenty-four hours a day, seven days a week offering understanding of complex health issues, holistic approaches to ailments, and advice for the patient that extends to the family. Nurses themselves are a powerful tool in the healing process. The What Nurses Know series will give down-to-earth information, address consumers as equal partners in their care and explain clearly what a reader needs to know and wants to know to understand their condition and move forward with their lives. "

The first edition of this book was first on the market to address the complete perspective of patient care for the AIDS patient. This revised edition provides an in-depth overview of the pathophysiology, transmission, spectrum of disease and medical management of HIV disease in adults and adolescents. Psychological issues are addressed as well as the scope of physical signs and symptoms of the patient. Nursing interventions are categorized based both on accepted nursing diagnoses and primary, secondary, and tertiary prevention.

Offering practical solutions to the problems associated with nursing care for HIV and AIDS patients, this resource is written by two highly experienced nurses from the context of both the healthcare and home environments. Designed as an easily accessible, quick-reference guide, topics include HIV and pregnancy, pediatric management, dealing with infections, and the principles of anti-retroviral therapy. Additional chapters include counseling and living positively with HIV and AIDS. The most recent research is presented and the interactive approach makes the task of putting theory into practice achievable.

Clinical handbook providing detailed guidelines for managing AIDS/HIV infected patients. The book provides detailed nursing care plans, information on pathogenesis, medical care and current drugs in use. It also covers psychosocial and spiritual care, infection control and ethical aspects.

The Association of Nurses in AIDS Care (ANAC) presents the essential information needed by every nurse working with HIV/AIDS patients in any setting. The text provides an educational framework for HIV/AIDS clinical content and serves those preparing for specialty certification in HIV/AIDS training. The text covers: A) Infection, transmission, and prevention B) Clinical management of a variety of patient types C) Symptomatic

conditions and symptom management D) Special populations E) Psychosocial concerns for patients. ANAC's Core Curriculum for HIV/AIDS Nursing, Third Edition includes the following new topics: Updates to the evidence basis underlying the nursing care of persons with HIV/AIDS. New issues and challenges including the care for pediatric patients and adults with giardia, syphilis and bipolar disease. New text features including case studies and quizzes.
