Urban Stormwater Management - University of California ...

Integrated urban water management is a philosophy of varying definitions and interpretations. According to the authors of the book entitled, "Integrated Urban Water Management: Humid Tropics", IUWM is described as the practice of managing freshwater, wastewater, and storm water as components of a basin-wide management plan. It builds on existing water supply and sanitation considerations within an urban settlement by incorporating urban water management within the scope of the entire river basin

Integrated urban water management - Wikipedia

urban design is provided in this SPD. 1.6 The Development Management (DM) Policies (2013) provides more detailed policies to ensure the Core Strategy is effectively implemented. Policy DM2.1 Design is the key policy against which applications will be assessed in relation to design quality, and this SPD has been
